The Anatomy Of A JV Page

Below you will find the components that every JV page should have. If you're launching a product once you have everything ready to go with your product your next step is to create a JV page that you can send potential affiliates to so that they can promote your product.

I have created a simple JV page template that you can download by **clicking here**. This is a simple HTML page and an easier way to create jv pages is by using something like **Optimize Press** which is a Word Press theme. You can get Optimize Press at http://www.ThisKicksButt.com/OptimizePress

Please note though that you should start studying the JV pages of people who are launching products in the Internet marketing niches, and other niches too. You can get a lot of good ideas what you should be putting on your own page.

To your success!
